

AGENDA
SHAWNEE MUNICIPAL AUTHORITY
March 7, 2022 AT 6:00 P.M.
COMMISSION CHAMBERS AT CITY HALL
16 WEST 9TH STREET
SHAWNEE, OKLAHOMA

Official action can only be taken on items which appear on the agenda. The public body may adopt, approve, ratify, deny, defer, recommend, amend, strike, or continue any agenda item. When more information is needed to act on an item, the public body may refer the matter to Staff or back to Committee or the recommending body. Under certain circumstances, items are deferred to a future date or stricken from the agenda entirely.

CALL TO ORDER

DECLARATION OF A QUORUM

1. Consider approval of Consent Agenda:
 - a. Minutes from the February 22, 2022 regular meeting.
2. Consideration of a budget amendment for Fund 501 Shawnee Municipal Authority to increase loan proceeds and other contractual services in order to properly fund the water treatment plant expansion project for Fiscal Year 2022.
3. Confirm action taken by the City Commission on Agenda Item No. 16 with respect to a resolution updating the City Fee Schedule by: (1) setting the water rates for residential and commercial use, both inside and outside the city limits, pursuant to Subsections (a) and (b), Section 26-26, Article II, Chapter 26 of the City Code; and (2) setting the sanitary sewer rates for residential and commercial use, both inside and outside the city limits, pursuant to Subsections (b) and (c), Section 26-27, Article II, Chapter 26 of the Code of the City of Shawnee; and amend residential deposit rates in Section 26-132(a), Article III, Division 2, Subdivision II of Chapter 26 of the City Code.
4. Confirm action taken by the City Commission on Agenda Item No. 17 with respect to a resolution updating the City Fee Schedule by setting the monthly rates and fees for solid waste services pursuant to Subsections (a), Section 23-38, Article II, Chapter 23 of the City Code.
5. New Business

(Any matter not known or which could not have been reasonably foreseen prior to the posting of the agenda)
6. Adjournment

Respectfully submitted,

Lisa Lasyone, CMC, City Clerk

The City of Shawnee encourages participation from its citizens in public meetings. If participation is not possible due to a disability, notify the City Clerk, in writing, at least forty-eight hours prior to the scheduled meeting and necessary accommodations will be made. (ADA 28 CFR/36)

THE TRUSTEES OF THE SHAWNEE MUNICIPAL AUTHORITY OF THE CITY OF SHAWNEE, COUNTY OF POTTAWATOMIE, STATE OF OKLAHOMA, MET IN REGULAR SCHEDULED SESSION, TUESDAY, FEBRUARY 22, 2022, DURING THE BOARD OF CITY COMMISSIONER MEETING AT 6:00 P.M., PURSUANT TO NOTICE DULY POSTED AS PRESCRIBED BY LAW AT 6:20 P.M. ON FEBRUARY 17, 2022. UPON ROLL CALL, A QUORUM WAS DECLARED WITH THE FOLLOWING MEMBERS IN ATTENDANCE:

PRESENT: Matthews, Engles, Bolt, Rutherford, Salter

ABSENT: Flood, Sehorn

Call to Order

Declaration of a Quorum

AGENDA ITEM NO. 1:

Consider approval of Consent Agenda:

- a. Minutes from the February 7, 2022 regular meeting.

A motion was made by Trustee Matthews, seconded by Trustee Engles, to approve Consent Agenda Item No. 1(a). Motion carried 5-0.

AYE: Matthews, Engles, Bolt, Rutherford, Salter

NAY: None

AGENDA ITEM NO. 2:

Confirm action taken by the City Commission on Agenda Item No. 6 regarding an Addendum to the Contract for Solid Waste Collection, Recycling and Disposal Services.

A motion was made by Trustee Rutherford, seconded by Trustee Matthews, to ratify action taken by the City Commission on Agenda Item No. 6 regarding an Addendum to the Contract for Solid Waste Collection, Recycling and Disposal Services. Motion carried 5-0.

AYE: Rutherford, Matthews, Engles, Bolt, Salter

NAY: None

AGENDA ITEM NO. 3:

New Business (Any matter not known, or which could not have been reasonably foreseen prior to the posting of the agenda)

There was no New Business.

AGENDA ITEM NO. 4.:

Adjournment

There being no further business to be considered, the meeting was adjourned by power of the Chair. (7:54 p.m.)

ATTEST:

ED BOLT, CHAIRMAN

LISA LASYONE, CMC, CITY CLERK

Memo

Budget Amendment

Finance

16 W. 9th St.
Shawnee, OK 74801
ShawneeOK.org

Date: March 3, 2022
To: City Commission
From: Jacob Bussell, Assistant Finance Director
Subject: Consideration of budget amendments to appropriate funds for Water Treatment Plant Expansion Project.

Background: During FY22, construction began on the Water Treatment Plant Expansion Project. The project is being financed through an OWRB loan (approx. \$17.4M). The original budget for project costs in FY22 is \$2.1M, but due to construction proceeding quicker than expected additional appropriations are required to keep the project properly funded. The amount for appropriation, is as follows:

- \$6,850,000 – Water Treatment Plant Expansion Project - projected costs remaining for FY22.

Financial Impact: See Budget Amendment Attached

Attachment: Amendment.

Staff Recommendation: Approval of the item.

Estimated Revenue, Fund Balance, or Transfers IN

Fund Number	Account Number	Project Code	Line Item	Description	Balance Before Amendment	Amount of Amendment Increase (Decrease)	Balance After Amendment
501	48530			LOAN PROCEEDS	2,920,000.00	6,850,000.00	9,770,000.00

Labor Dept.

Resolution

Exhibit A

City Clerk's Office

16 W. 9th St.
Shawnee, OK 74801
ShawneeOK.org

Date: March 7, 2022
To: City Commission
From: Lisa Lasyone, City Clerk
Subject: Consideration of a Resolution Updating the City Fee Schedule to Increase Water and Sewer Rates for Residential and Commercial Use and Increasing the Residential Deposit

Background: By Resolution, the City may conduct an annual review of its water and sewer rates and account for possible adjustments per the Consumer Price Index (CPI) for both residential and commercial accounts. Per the U.S. Bureau of Labor Statistics, the CPI for water and sewage maintenance is 3% as of December 31, 2021.

For residential customers inside the City limits, the associated rate increase would be \$0.68 for the first 1,000 gallons, and \$0.13 per 1,000 gallons after that for water usage. For sewer usage, the increase would be \$0.44 for the first 1,000 gallons and \$0.10 for any usage over 1,000 gallons. The minimum bill will increase from \$64.41 to approximately \$67.26.

The City of Shawnee Municipal Code also allows for the deposit amount for residential services to be amended from time to time. The current residential deposit is \$75 per account. This resolution increases the residential deposit to \$100 per account, which will be approximately 1½ times the minimum bill. Utility deposits are held in a separate fund for the restricted use of the deposit being applied to any unpaid balance when the account is closed, and any remaining funds being returned to the customer.

Financial Impact:

Water 3%:

Estimated revenue of \$201,162 to Shawnee Municipal Authority Fund, Water Sales, 501-45010.

Sewer 3%:

Estimated revenue of \$115,181 to Shawnee Municipal Authority Fund, Sewer Service, 501-45020.

CONSUMER PRICE INDEX – DECEMBER 2021

The Consumer Price Index for All Urban Consumers (CPI-U) increased 0.5 percent in December on a seasonally adjusted basis after rising 0.8 percent in November, the U.S. Bureau of Labor Statistics reported today. Over the last 12 months, the all items index increased 7.0 percent before seasonal adjustment.

Increases in the indexes for shelter and for used cars and trucks were the largest contributors to the seasonally adjusted all items increase. The food index also contributed, although it increased less than in recent months, rising 0.5 percent in December. The energy index declined in December, ending a long series of increases; it fell 0.4 percent as the indexes for gasoline and natural gas both decreased.

The index for all items less food and energy rose 0.6 percent in December following a 0.5-percent increase in November. This was the sixth time in the last 9 months it has increased at least 0.5 percent. Along with the indexes for shelter and for used cars and trucks, the indexes for household furnishings and operations, apparel, new vehicles, and medical care all increased in December. As in November, the indexes for motor vehicle insurance and recreation were among the few to decline over the month.

The all items index rose 7.0 percent for the 12 months ending December, the largest 12-month increase since the period ending June 1982. The all items less food and energy index rose 5.5 percent, the largest 12-month change since the period ending February 1991. The energy index rose 29.3 percent over the last year, and the food index increased 6.3 percent.

Food

The food index increased 0.5 percent in December following larger increases in each of the three previous months. The food at home index increased 0.4 percent in December after rising 0.8 percent in November. Five of the six major grocery store food group indexes increased in December. The index for fruits and vegetables increased the most, rising 0.9 percent over the month as the index for fresh fruits increased 1.8 percent. The index for nonalcoholic beverages rose 0.8 percent in December, and the index for dairy and related products increased 0.7 percent. The index for other food at home rose 0.6 percent, and the index for cereals and bakery products increased 0.4 percent over the month.

The index for meats, poultry, fish, and eggs declined in December, falling 0.4 percent after rising at least 0.7 percent in each of the last 7 months. The indexes for beef (-2.0 percent) and pork (-0.8 percent) declined after recent sharp increases.

The food away from home index rose 0.6 percent in December, the same increase as in November. The index for full service meals rose 0.8 percent, and the index for limited service meals advanced 0.6 percent over the month.

The food at home index rose 6.5 percent over the last 12 months; this compares to a 1.5-percent annual increase over the last 10 years. All of the six major grocery store food group indexes increased over the period. By far the largest increase was that of the index for meats, poultry, fish, and eggs, which rose 12.5 percent over the year despite falling in December. The index for dairy and related products increased 1.6 percent, the smallest increase among the groups.

The index for food away from home rose 6.0 percent over the last year, the largest increase since January 1982. The index for limited service meals rose 8.0 percent over the last 12 months, and the index for full service meals rose 6.6 percent. The index for food at employee sites and schools, in contrast, declined 49.3 percent over the past 12 months, reflecting widespread free lunch programs.

Energy

The energy index declined 0.4 percent in December; this followed a 3.5-percent increase in November and was its first decrease since April 2021. The gasoline index fell 0.5 percent in December after rising 6.1 percent in both November and October. (Before seasonal adjustment, gasoline prices fell 2.2 percent in December.) The index for natural gas also declined in December, falling 1.2 percent after rising in each of the last 10 months. The electricity index, in contrast, rose in December, increasing 0.3 percent, the same increase as in November.

The energy index rose 29.3 percent over the past 12 months with all major energy component indexes increasing. The gasoline index rose 49.6 percent over the last year. The index for natural gas rose 24.1 percent over the last 12 months, and the electricity index rose 6.3 percent.

All items less food and energy

The index for all items less food and energy rose 0.6 percent in December. The shelter index increased 0.4 percent in December as the indexes for rent and owners' equivalent rent both rose 0.4 percent, the same increases as in November and October. The index for used cars and trucks continued to rise, advancing 3.5 percent in December after increasing 2.5 percent in each of the prior 2 months.

The index for household furnishings and operations rose 1.1 percent over the month as the indexes for furniture and bedding and for housekeeping supplies increased. The apparel index rose 1.7 percent over the month, its largest increase since January 2021. The index for new vehicles continued to rise, increasing 1.0 percent in December; this was its eighth consecutive monthly increase of at least 1.0 percent.

The medical care index rose 0.3 percent in December. The index for hospital services increased 0.2 percent and the index for prescription drugs rose 0.1 percent, while the index for physicians' services was unchanged. Other indexes that rose in December include airline fares (+2.7 percent), personal care (+0.5 percent), tobacco (+0.7 percent), and education (+0.1 percent).

In contrast to these increases, the motor vehicle insurance index fell 1.5 percent in December after declining 0.8 percent the prior month. The recreation index fell 0.2 percent in December, the same decline as last month. The communication index was unchanged over the month.

The index for all items less food and energy rose 5.5 percent over the past 12 months, its largest 12-month increase since the period ending February 1991. Major contributors to this increase include shelter (+4.1 percent) and used cars and trucks (+37.3 percent). However, the increase is broad-based, with virtually all component indexes showing increases over the past 12 months.

Not seasonally adjusted CPI measures

The Consumer Price Index for All Urban Consumers (CPI-U) increased 7.0 percent over the last 12 months to an index level of 278.802 (1982-84=100). For the month, the index increased 0.3 percent prior to seasonal adjustment.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) increased 7.8 percent over the last 12 months to an index level of 273.925 (1982-84=100). For the month, the index rose 0.3 percent prior to seasonal adjustment.

The Chained Consumer Price Index for All Urban Consumers (C-CPI-U) increased 6.9 percent over the last 12 months. For the month, the index increased 0.3 percent on a not seasonally adjusted basis. Please note that the indexes for the past 10 to 12 months are subject to revision.

The Consumer Price Index for January 2022 is scheduled to be released on Thursday, February 10, 2022 at 8:30 a.m. (ET).

Coronavirus (COVID-19) Pandemic Impact on December 2021 Consumer Price Index Data

Data collection by personal visit for the Consumer Price Index (CPI) program has been suspended almost entirely since March 16, 2020. When possible, data normally collected by personal visit were collected either online or by phone. Additionally, data collection in December was affected by the temporary closing or limited operations of certain types of establishments. These factors resulted in an increase in the number of prices considered temporarily unavailable and imputed. While the CPI program attempted to collect as much data as possible, many indexes are based on smaller amounts of collected prices than usual, and a small number of indexes that are normally published were not published this month.

For each month from March 2020 to December 2021, BLS has published a summary of the impact of the pandemic on the Consumer Price Index news release and data. The impact summary for December is available at www.bls.gov/covid19/consumer-price-index-covid19-impacts-december-2021.htm. Beginning with publication of January 2022 data in February 2022, this month-specific impact summary will be discontinued. However, information related to the impact of the pandemic will continue to be available at www.bls.gov/covid19/effects-of-covid-19-pandemic-on-consumer-price-index.htm.

Technical Note

Brief Explanation of the CPI

The Consumer Price Index (CPI) measures the change in prices paid by consumers for goods and services. The CPI reflects spending patterns for each of two population groups: all urban consumers and urban wage earners and clerical workers. The all urban consumer group represents about 93 percent of the total U.S. population. It is based on the expenditures of almost all residents of urban or metropolitan areas, including professionals, the self-employed, the poor, the unemployed, and retired people, as well as urban wage earners and clerical workers. Not included in the CPI are the spending patterns of people living in rural nonmetropolitan areas, farming families, people in the Armed Forces, and those in institutions, such as prisons and mental hospitals. Consumer inflation for all urban consumers is measured by two indexes, namely, the Consumer Price Index for All Urban Consumers (CPI-U) and the Chained Consumer Price Index for All Urban Consumers (C-CPI-U).

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) is based on the expenditures of households included in the CPI-U definition that meet two requirements: more than one-half of the household's income must come from clerical or wage occupations, and at least one of the household's earners must have been employed for at least 37 weeks during the previous 12 months. The CPI-W population represents about 29 percent of the total U.S. population and is a subset of the CPI-U population.

The CPIs are based on prices of food, clothing, shelter, fuels, transportation, doctors' and dentists' services, drugs, and other goods and services that people buy for day-to-day living. Prices are collected each month in 75 urban areas across the country from about 6,000 housing units and approximately 22,000 retail establishments (department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments). All taxes directly associated with the purchase and use of items are

included in the index. Prices of fuels and a few other items are obtained every month in all 75 locations. Prices of most other commodities and services are collected every month in the three largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by personal visits or telephone calls by the Bureau's trained representatives.

In calculating the index, price changes for the various items in each location are aggregated using weights, which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. For the CPI-U and CPI-W, separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 23 selected local areas. Area indexes do not measure differences in the level of prices among cities; they only measure the average change in prices for each area since the base period. For the C-CPI-U, data are issued only at the national level. The CPI-U and CPI-W are considered final when released, but the C-CPI-U is issued in preliminary form and subject to three subsequent quarterly revisions.

The index measures price change from a designed reference date. For most of the CPI-U and the CPI-W, the reference base is 1982-84 equals 100. The reference base for the C-CPI-U is December 1999 equals 100. An increase of 7 percent from the reference base, for example, is shown as 107.000. Alternatively, that relationship can also be expressed as the price of a base period market basket of goods and services rising from \$100 to \$107.

Sampling Error in the CPI

The CPI is a statistical estimate that is subject to sampling error because it is based upon a sample of retail prices and not the complete universe of all prices. BLS calculates and publishes estimates of the 1-month, 2-month, 6-month, and 12-month percent change standard errors annually for the CPI-U. These standard error estimates can be used to construct confidence intervals for hypothesis testing. For example, the estimated standard error of the 1-month percent change is 0.03 percent for the U.S. all items CPI. This means that if we repeatedly sample from the universe of all retail prices using the same methodology, and estimate a percentage change for each sample, then 95 percent of these estimates will be within 0.06 percent of the 1-month percentage change based on all retail prices. For example, for a 1-month change of 0.2 percent in the all items CPI-U, we are 95 percent confident that the actual percent change based on all retail prices would fall between 0.14 and 0.26 percent. For the latest data, including information on how to use the estimates of standard error, see <https://www.bls.gov/cpi/tables/variance-estimates/home.htm>.

Calculating Index Changes

Movements of the indexes from 1 month to another are usually expressed as percent changes rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period, while percent changes are not. The following table shows an example of using index values to calculate percent changes:

	Item A	Item B	Item C
Year I	112.500	225.000	110.000
Year II	121.500	243.000	128.000
Change in index points	9.000	18.000	18.000
Percent change	$9.0/112.500 \times 100 = 8.0$	$18.0/225.000 \times 100 = 8.0$	$18.0/110.000 \times 100 = 16.4$

Use of Seasonally Adjusted and Unadjusted Data

The Consumer Price Index (CPI) produces both unadjusted and seasonally adjusted data. Seasonally adjusted data are computed using seasonal factors derived by the X-13ARIMA-SEATS seasonal adjustment method. These factors are updated each February, and the new factors are used to revise the previous 5 years of seasonally adjusted data. The factors are available at www.bls.gov/cpi/tables/seasonal-adjustment/seasonal-factors-2021.xlsx. For more information on data revision scheduling, please see the Factsheet on Seasonal Adjustment at www.bls.gov/cpi/seasonal-adjustment/questions-and-answers.htm and the Timeline of Seasonal Adjustment Methodological Changes at www.bls.gov/cpi/seasonal-adjustment/timeline-seasonal-adjustment-methodology-changes.htm.

For analyzing short-term price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from weather events, production cycles, model changeovers, holidays, and sales. This allows data users to focus on changes that are not typical for the time of year. The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data are also used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index before adjustment for seasonal variation. BLS advises against the use of seasonally adjusted data in escalation agreements because seasonally adjusted series are revised annually.

Intervention Analysis

The Bureau of Labor Statistics uses intervention analysis seasonal adjustment for some CPI series. Sometimes extreme values or sharp movements can distort the underlying seasonal pattern of price change. Intervention analysis seasonal adjustment is a process by which the distortions caused by such unusual events are estimated and removed from the data prior to calculation of seasonal factors. The resulting seasonal factors, which more accurately represent the seasonal pattern, are then applied to the unadjusted data.

For example, this procedure was used for the motor fuel series to offset the effects of the 2009 return to normal pricing after the worldwide economic downturn in 2008. Retaining this outlier data during seasonal factor calculation would distort the computation of the seasonal portion of the time series data for motor fuel, so it was estimated and removed from the data prior to seasonal adjustment. Following that, seasonal factors were calculated based on this “prior adjusted” data. These seasonal factors represent a clearer picture of the seasonal pattern in the data. The last step is for motor fuel seasonal factors to be applied to the unadjusted data.

For the seasonal factors introduced for January 2021, BLS adjusted 72 series using intervention analysis seasonal adjustment, including selected food and beverage items, motor fuels, electricity, and vehicles.

Revision of Seasonally Adjusted Indexes

Seasonally adjusted data, including the U.S. city average all items index levels, are subject to revision for up to 5 years after their original release. Every year, economists in the CPI calculate new seasonal factors for seasonally adjusted series and apply them to the last 5 years of data. Seasonally adjusted indexes beyond the last 5 years of data are considered to be final and not subject to revision. For January 2021, revised seasonal factors and seasonally adjusted indexes for 2016 to 2020 were calculated and published. For series which are directly adjusted using the Census X-13ARIMA-SEATS seasonal adjustment software, the seasonal factors for 2020 will be applied to data for 2021 to produce the seasonally adjusted 2021 indexes. Series which are indirectly seasonally adjusted by summing

seasonally adjusted component series have seasonal factors which are derived and are therefore not available in advance.

Determining Seasonal Status

Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. Using these criteria, BLS economists determine whether a series should change its status from "not seasonally adjusted" to "seasonally adjusted", or vice versa. If any of the 81 components of the U.S. city average all items index change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used in the aggregation of the dependent series for the last 5 years, but the seasonally adjusted indexes before that period will not be changed. Thirty-four of the 81 components of the U.S. city average all items index are not seasonally adjusted for 2021.

Contact Information

For additional information about the CPI visit www.bls.gov/cpi or contact the CPI Information and Analysis Section at 202-691-7000 or cpi_info@bls.gov.

For additional information on seasonal adjustment in the CPI visit www.bls.gov/cpi/seasonal-adjustment/home.htm or contact the CPI seasonal adjustment section at 202-691-6968 or cpiseas@bls.gov.

Information from this release will be made available to sensory impaired individuals upon request. Voice phone: 202-691-5200; Federal Relay Service: 1-800-877-8339.

¹ Foods, fuels, and several other items are priced every month in all areas. Most other goods and services are priced as indicated: M - Every month.

1 - January, March, May, July, September, and November. 2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions.

³ Indexes on a December 1996=100 base.

⁴ Indexes on a December 2017=100 base.

⁵ Indexes on a December 1986=100 base.

⁶ 1998 - 2017 indexes based on substantially smaller sample.

⁷ Indexes on a December 2001=100 base.

⁸ Indexes on a 1987=100 base.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

¹ The C-CPI-U is designed to be a closer approximation to a cost-of-living index in that it, in its final form, accounts for any substitution that consumers make across item categories in response to changes in relative prices. Since the expenditure data required for the calculation of the C-CPI-U are available only with a time lag, the C-CPI-U is issued first in preliminary form using the latest available expenditure data at that time and is subject to four revisions.

Indexes are issued as initial estimates. Indexes are revised each quarter with the publication of January, April, July, and October data as updated expenditure estimates become available. The C-CPI-U indexes are updated quarterly until they become final. January-March indexes are final in January of the following year; April-June indexes are final in April of the following year; July-September indexes are final in July of the following year; October-December indexes are final in October of the following year.

¹ The 'effect' of an item category is a measure of that item's contribution to the All items price change. For example, if the Food index had an effect of 0.40, and the All items index rose 1.2 percent, then the increase in food prices contributed 0.40 / 1.2, or 33.3 percent, to that All items increase. Said another way, had food prices been unchanged for that month the change in the All items index would have been 1.2 percent minus 0.40, or 0.8 percent. Effects can be negative as well. For example, if the effect of food was a negative 0.1, and the All items index rose 0.5 percent, the All items index actually would have been 0.1 percent higher (or 0.6 percent) had food prices been unchanged. Since food prices fell while prices overall were rising, the contribution of food to the All items price change was negative (in this case, -0.1 / 0.5, or minus 20 percent).

² A statistic's margin of error is often expressed as its point estimate plus or minus two standard errors. For example, if a CPI category rose 0.6 percent, and its standard error was 0.15 percent, the margin of error on this item's 1-month percent change would be 0.6 percent, plus or minus 0.3 percent.

³ If the current seasonally adjusted 1-month percent change is greater than the previous published 1-month percent change, then this column identifies the closest prior month with a 1-month percent change as (L)arge as or (L)arger than the current 1-month change. If the current 1-month percent change is smaller than the previous published 1-month percent change, the most recent month with a change as (S)mall or (S)maller than the current month change is identified. If the current and previous published 1-month percent changes are equal, a dash will appear. Standard numerical comparisons are used. For example, 0.8% is greater than 0.6%, -0.4% is less than -0.2%, and -0.2% is less than 0.0%. Note that a (L)arger change can be a smaller decline, for example, a -0.2% change is larger than a -0.4% change, but still represents a decline in the price index. Likewise, (S)maller changes can be increases, for example, a 0.6% change is smaller than 0.8%, but still represents an increase in the price index. In this context, a -0.2% change is considered to be smaller than a 0.0% change.

⁴ Not seasonally adjusted.

⁵ Indexes on a December 1997=100 base.

⁶ Special indexes based on a substantially smaller sample. These series do not contribute to the all items index aggregation and therefore do not have a relative importance or effect.

⁷ Indexes on a December 2007=100 base.

⁸ Indexes on a December 2005=100 base.

⁹ Indexes on a December 1986=100 base.

¹⁰ Indexes on a December 1993=100 base.

¹¹ Indexes on a December 2009=100 base.

¹² Indexes on a December 1990=100 base.

¹³ Indexes on a December 1983=100 base.

¹⁴ Indexes on a December 2001=100 base.

¹⁵ Indexes on a December 2019=100 base.

¹⁶ Indexes on a December 1982=100 base.

¹⁷ Indexes on a December 1996=100 base.

¹⁸ Indexes on a December 1988=100 base.

Other goods and services.....	3.077	4.5	0.141	0.34	L-Mar.2010	4.9
Personal care.....	2.460	3.4	0.086	0.41	L-Aug.1991	3.8

¹ The 'effect' of an item category is a measure of that item's contribution to the All items price change. For example, if the Food index had an effect of 0.40, and the All items index rose 1.2 percent, then the increase in food prices contributed 0.40 / 1.2, or 33.3 percent, to that All items increase. Said another way, had food prices been unchanged for that year the change in the All items index would have been 1.2 percent minus 0.40, or 0.8 percent. Effects can be negative as well. For example, if the effect of food was a negative 0.1, and the All items index rose 0.5 percent, the All items index actually would have been 0.1 percent higher (or 0.6 percent) had food prices been unchanged. Since food prices fell while prices overall were rising, the contribution of food to the All items price change was negative (in this case, -0.1 / 0.5, or minus 20 percent).

² A statistic's margin of error is often expressed as its point estimate plus or minus two standard errors. For example, if a CPI category rose 2.6 percent, and its standard error was 0.25 percent, the margin of error on this item's 12-month percent change would be 2.6 percent, plus or minus 0.5 percent.

³ If the current 12-month percent change is greater than the previous published 12-month percent change, then this column identifies the closest prior month with a 12-month percent change as (L)arger as or (L)arger than the current 12-month change. If the current 12-month percent change is smaller than the previous published 12-month percent change, the most recent month with a change as (S)mall or (S)maller than the current month change is identified. If the current and previous published 12-month percent changes are equal, a dash will appear. Standard numerical comparison is used. For example, 2.0% is greater than 0.6%, -4.4% is less than -2.0%, and -2.0% is less than 0.0%. Note that a (L)arger change can be a smaller decline, for example, a -0.2% change is larger than a -0.4% change, but still represents a decline in the price index. Likewise, (S)maller changes can be increases, for example, a 0.6% change is smaller than 0.8%, but still represents an increase in the price index. In this context, a -0.2% change is considered to be smaller than a 0.0% change.

⁴ Indexes on a December 1997=100 base.

⁵ Special indexes based on a substantially smaller sample. These series do not contribute to the all items index aggregation and therefore do not have a relative importance or effect.

⁶ Indexes on a December 2007=100 base.

⁷ Indexes on a December 2005=100 base.

⁸ Indexes on a December 1986=100 base.

⁹ Indexes on a December 1993=100 base.

¹⁰ Indexes on a December 2009=100 base.

¹¹ Indexes on a December 1990=100 base.

¹² Indexes on a December 1983=100 base.

¹³ Indexes on a December 2001=100 base.

¹⁴ Indexes on a December 2019=100 base.

¹⁵ Indexes on a December 1982=100 base.

¹⁶ Indexes on a December 1996=100 base.

¹⁷ Indexes on a December 1988=100 base.

RESOLUTION NO. _____

A RESOLUTION UPDATING THE CITY FEE SCHEDULE BY: (1) SETTING THE WATER RATES FOR RESIDENTIAL AND COMMERCIAL USE, BOTH INSIDE AND OUTSIDE THE CITY LIMITS, PURSUANT TO SUBSECTIONS (a) AND (b), SECTION 26-26, ARTICLE II, CHAPTER 26 OF THE CITY CODE; AND (2) SETTING THE SANITARY SEWER RATES FOR RESIDENTIAL AND COMMERCIAL USE, BOTH INSIDE AND OUTSIDE THE CITY LIMITS, PURSUANT TO SUB-SECTIONS (b) AND (c), SECTION 26-27, ARTICLE II, CHAPTER 26 OF THE CODE OF THE CITY OF SHAWNEE; AND AMEND RESIDENTIAL DEPOSIT RATES IN SECTION 26-132(a), ARTICLE III, DIVISION 2, SUBDIVISION II OF CHAPTER 26 OF THE CITY CODE.

WHEREAS, The City, through the passage of Ordinance No. 2599NS, has adopted a City Fee Schedule as a part of the Code of the City of Shawnee, Oklahoma that contains the description of various fees administered by the City;

WHEREAS, pursuant to Ordinance No. 2599NS, Subsequent versions, adoptions, and updates of the City Fee Schedule shall be accomplished by resolution of the City Commission;

WHEREAS, Part II, Chapter 26, Article II, Sections 26-26 provides for the setting, and updating, of municipal water rates from time to time by resolution of the City Commission, and that such rates shall be described in the City Fee Schedule;

WHEREAS, Part II, Chapter 26, Article II, Section 26-27 provides for the setting, and updating, of municipal sewer rates from time to time by resolution of the City Commission, and that such rates shall be described in the City Fee Schedule;

WHEREAS, the City Commission wishes to update the City Fee Schedule in a manner described below so as to set the municipal water rates pursuant to Section 26-26, and to set the municipal sewer rates pursuant to Section 26-27;

WHEREAS, Chapter 26, Article III, Section 26-132(a) provides for the setting, and updating, of the deposit for residential water service from time to time by resolution of the City Commission, and that such rates shall be described in the City Fee Schedule; and

WHEREAS, the City Commission wishes to update the City Fee Schedule in a manner described below so as to set the deposit for residential water service pursuant to Section 26-132(a).

NOW THEREFORE, BE IT RESOLVED BY THE MAYOR AND CITY COMMISSIONERS OF THE CITY OF SHAWNEE, OKLAHOMA:

Section 1. Sub-Section (a), Section 26-26, Article II, Chapter 26 of the Code of the City of Shawnee provides that: The minimum charge for water used by consumers inside the city limits shall be in amount described in the City Fee Schedule adopted and updated from time to time by resolution of the City Commission.

Accordingly, the water rates listed in the City Fee Schedule, pursuant to, and associated with, Sub-Section (a), Section 26-26, Article II, Chapter 26 of the Code of the City of Shawnee, are hereby updated to read as follows:

(a) Water Rates: The minimum charge for water used by consumers inside the city limits:

RESIDENTIAL

Number of Gallons	Monthly Rate Per Thousand Gallons
0—1,000	\$23.42
1,001—4,000	\$4.40

1,000,001—2,000,000	\$4.64
More than 2,000,000	\$4.74

COMMERCIAL – INSIDE COMPOUND METER

Number of Gallons	Monthly Rate Per Thousand Gallons
0—1,000	\$29.28
1,001—4,000	\$4.40
4,001—1,000,000	\$4.51
1,000,001—2,000,000	\$4.64
More than 2,000,000	\$4.74

Section 2. That Sub-Section (b), Section 26-26, Article II, Chapter 26 of the Code of the City of Shawnee provides that: The rate to be charged for furnishing water for consumption outside the city limits shall be in amount as described in the city fee schedule adopted and updated from time to time by resolution by commission.

Accordingly, the water rates listed in the City Fee Schedule, pursuant to, and associated with, Sub-Section (b), Section 26-26, Article II, Chapter 26 of the Code of the City of Shawnee, are hereby updated to read as follows:

(b) Water Rates: The rate to be charged for furnishing water for consumption outside the city limits:

RESIDENTIAL

Number of Gallons	Monthly Rate Per Thousand Gallons
0—1,000	\$27.22
1,001—4,000	\$6.61
4,001—1,000,000	\$6.78
1,000,001—2,000,000	\$6.95
More than 2,000,000	\$7.12

COMMERCIAL

Number of Gallons	Monthly Rate Per Thousand Gallons

1,000,001—2,000,000	\$6.95
More than 2,000,000	\$7.12

Section 3. That Sub-Section (b), Section 26-27, Article II, Chapter 26 of the Code of the City of Shawnee provides that: The charge for sanitary sewer use by consumers inside the city limits shall be in an amount as described in the City Fee Schedule adopted and updated from time to time by resolution of the City Commission.

Accordingly, the sewer rates listed in the City Fee Schedule, pursuant to, and associated with, Sub-Section (b), Section 26-27, Article II, Chapter 26 of the Code of the City of Shawnee, are hereby updated to read as follows:

(b) Sewer Rates: The charge for sanitary sewer use by consumers inside the city limits:

RESIDENTIAL

Number of Gallons	Monthly Rate Per Thousand Gallons
0—1,000	\$15.27
Over 1,000	\$3.38

COMMERCIAL

Number of Gallons	Monthly Rate Per Thousand Gallons
0—1,000	\$19.11
Over 1,000	\$3.29

Section 4. That Sub-Section (c), Section 26-27, Article II, Chapter 26 of the Code of the City of Shawnee provides that: The charge for sanitary sewer use by consumers outside the city limits shall be in an amount as described in the city fee schedule and updated from time to time by resolution of the city commission.

Accordingly, the rates listed in the City Fee Schedule, pursuant to, and associated with, Sub-Section (c), Section 26-27, Article II, Chapter 26 of the Code are hereby updated to read as follows:

(c) The rate to be charged for furnishing water for consumption outside the city limits:

RESIDENTIAL

Number of Gallons	Monthly Rate Per Thousand Gallons
0—1,000	\$22.92
Over 1,000	\$4.92

COMMERCIAL

Number of Gallons	Monthly Rate Per Thousand Gallons
0—1,000	\$28.64
Over 1,000	\$4.92

Section 5. Residential Deposits. That Section 26-132(a), Article III, Division 2, Subdivision II of Chapter 26, provides that the cash deposit for residential water service shall be in an amount described in the City fee schedule and updated from time to time by resolution of the city commission.

Accordingly, the rate listed in the City Fee Schedule, pursuant to, and associated with Section 26-132(a), Article III, Division 2, Subdivision II of Chapter 26, to:

Water Service Cash Deposit - Residential	\$100
---	-------

Section 6. **Annual review of rates and possible increases.** City Staff shall annually, no later than December 31 of each calendar year, review the Consumer Price Index (CPI) through the United States Bureau of Labor Statistics, to measure the average change over time in the prices paid by consumers for utility services. Increases of the above listed rates for both residential and commercial accounts may be amended per CPI as of December 31 of the calendar year. Said rate increases will take into effect on April 1 of the following calendar year. A Resolution will be presented to the Commission to update the City Fee Schedule of any rate changes.

Section 7. **Adoption and Update of City Fee Schedule.** That attached hereto is the updated portion of the City Fee Schedule as created above (Exhibit “A”). This Resolution updates and changes City Fee Schedule only to the extent as described above. All other existing fees, fines, bonds, and insurance amounts described in the City Fee Schedule, not expressly updated herein, shall remain the same, and are otherwise re-adopted, for full force and effect, in the Code of the City of Shawnee.

Section 8. **Effective Date.** The effective date of the fee changes in this Resolution is May 1, 2022

PASSED AND APPROVED this _____ day of March, 2022.

Central Disposal Letter

Resolution

Exhibit A

Exhibit B

City Clerk's Office

16 W. 9th St.
Shawnee, OK 74801
ShawneeOK.org

Date: March 7, 2022
To: City Commission
From: Lisa Lasyone, City Clerk
Subject: Consideration of a Resolution Updating the City Fee Schedule to Increase Sanitation Rates for Residential Customers

Background: The City entered into a contract with Central Disposal for solid waste collection, recycling and disposal services on July 1, 2020. In the Request for Production, Section 9.6.1 of the *General and Special Provisions for Solid Waste Collection, Recycling and Disposal Services*, states:

Fees which may be charged by the CONTRACTOR for the second and subsequent period of the contract will be adjusted upward or downward to reflect changes in the cost of operations, as reflected by fluctuations in the Consumer Price Index for All Urban Consumers: Water and Sewer and Trash Collection Services, as published by the U.S. Bureau of Labor Statistics. It is expressly understood and agreed that the maximum annual increase shall not exceed 3.5 percent (3.5%).

The Memorandum entered into between the City and Central Disposal on May 18, 2020, provides:

Thereafter, the Contract Rate shall be increased, yearly, in accordance with the percentage increase in the CPI ("Consumer Price Index") over the previous twelve (12) month period from 2020 (i.e. the difference, expressed as a percentage, between the value of the CPI in June, 2021, and the value of the CPI published in June, 2020). The new adjusted Contract Rate shall begin on July 1, of each year. If in any year the CPI decreases, the Contract Rate for that year shall remain flat (and shall not increase or decrease).

The City received a letter from Central Disposal dated March 1, 2022 advising that they would exercise the right of the CPI clause at the rate of 3.5% effective July 1, 2022 (attached).

Provided in the Schedule of Quotes submitted by Central Disposal and approved by the City at the time the Contract was entered into on July 1, 2020, Central Disposal would provide a hazardous water collection to residential customers once a year at a rate of \$0.75 per month, per account. At that time, the City did not include the item in the billing system nor did Central Disposal bill the City for the

service. This resolution corrects the oversight by incorporating the agreed upon rate in order to provide the annual hazardous waste collection to residential customers.

In addition to the 3.5% increase over previous year sanitation rates, the City will incorporate the cost for the annual hazardous waste collection. The added amount will be for \$1.00 which provides \$0.75 to be paid to Central Disposal and \$0.25 to be applied towards administrative services provided by City staff.

Financial Impact:

3.5% Increase:

Estimated revenue of \$94,535 to Shawnee Municipal Authority Fund, Sanitation Service, 501-45030.

Estimated expense of \$94,535 from Shawnee Municipal Authority Fund, Utility Administration, Other Contractual Services, 501-5-1010-53390.

Hazardous Waste Component:

Estimated revenue of \$144,000 to Shawnee Municipal Authority Fund, Sanitation Service, 501-45030.

Estimated expense of \$108,000 from Shawnee Municipal Authority Fund, Utility Administration, Other Contractual Services, 501-5-1010-53390.

CONSUMER PRICE INDEX – DECEMBER 2021

The Consumer Price Index for All Urban Consumers (CPI-U) increased 0.5 percent in December on a seasonally adjusted basis after rising 0.8 percent in November, the U.S. Bureau of Labor Statistics reported today. Over the last 12 months, the all items index increased 7.0 percent before seasonal adjustment.

Increases in the indexes for shelter and for used cars and trucks were the largest contributors to the seasonally adjusted all items increase. The food index also contributed, although it increased less than in recent months, rising 0.5 percent in December. The energy index declined in December, ending a long series of increases; it fell 0.4 percent as the indexes for gasoline and natural gas both decreased.

The index for all items less food and energy rose 0.6 percent in December following a 0.5-percent increase in November. This was the sixth time in the last 9 months it has increased at least 0.5 percent. Along with the indexes for shelter and for used cars and trucks, the indexes for household furnishings and operations, apparel, new vehicles, and medical care all increased in December. As in November, the indexes for motor vehicle insurance and recreation were among the few to decline over the month.

The all items index rose 7.0 percent for the 12 months ending December, the largest 12-month increase since the period ending June 1982. The all items less food and energy index rose 5.5 percent, the largest 12-month change since the period ending February 1991. The energy index rose 29.3 percent over the last year, and the food index increased 6.3 percent.

Food

The food index increased 0.5 percent in December following larger increases in each of the three previous months. The food at home index increased 0.4 percent in December after rising 0.8 percent in November. Five of the six major grocery store food group indexes increased in December. The index for fruits and vegetables increased the most, rising 0.9 percent over the month as the index for fresh fruits increased 1.8 percent. The index for nonalcoholic beverages rose 0.8 percent in December, and the index for dairy and related products increased 0.7 percent. The index for other food at home rose 0.6 percent, and the index for cereals and bakery products increased 0.4 percent over the month.

The index for meats, poultry, fish, and eggs declined in December, falling 0.4 percent after rising at least 0.7 percent in each of the last 7 months. The indexes for beef (-2.0 percent) and pork (-0.8 percent) declined after recent sharp increases.

The food away from home index rose 0.6 percent in December, the same increase as in November. The index for full service meals rose 0.8 percent, and the index for limited service meals advanced 0.6 percent over the month.

The food at home index rose 6.5 percent over the last 12 months; this compares to a 1.5-percent annual increase over the last 10 years. All of the six major grocery store food group indexes increased over the period. By far the largest increase was that of the index for meats, poultry, fish, and eggs, which rose 12.5 percent over the year despite falling in December. The index for dairy and related products increased 1.6 percent, the smallest increase among the groups.

The index for food away from home rose 6.0 percent over the last year, the largest increase since January 1982. The index for limited service meals rose 8.0 percent over the last 12 months, and the index for full service meals rose 6.6 percent. The index for food at employee sites and schools, in contrast, declined 49.3 percent over the past 12 months, reflecting widespread free lunch programs.

Energy

The energy index declined 0.4 percent in December; this followed a 3.5-percent increase in November and was its first decrease since April 2021. The gasoline index fell 0.5 percent in December after rising 6.1 percent in both November and October. (Before seasonal adjustment, gasoline prices fell 2.2 percent in December.) The index for natural gas also declined in December, falling 1.2 percent after rising in each of the last 10 months. The electricity index, in contrast, rose in December, increasing 0.3 percent, the same increase as in November.

The energy index rose 29.3 percent over the past 12 months with all major energy component indexes increasing. The gasoline index rose 49.6 percent over the last year. The index for natural gas rose 24.1 percent over the last 12 months, and the electricity index rose 6.3 percent.

All items less food and energy

The index for all items less food and energy rose 0.6 percent in December. The shelter index increased 0.4 percent in December as the indexes for rent and owners' equivalent rent both rose 0.4 percent, the same increases as in November and October. The index for used cars and trucks continued to rise, advancing 3.5 percent in December after increasing 2.5 percent in each of the prior 2 months.

The index for household furnishings and operations rose 1.1 percent over the month as the indexes for furniture and bedding and for housekeeping supplies increased. The apparel index rose 1.7 percent over the month, its largest increase since January 2021. The index for new vehicles continued to rise, increasing 1.0 percent in December; this was its eighth consecutive monthly increase of at least 1.0 percent.

The medical care index rose 0.3 percent in December. The index for hospital services increased 0.2 percent and the index for prescription drugs rose 0.1 percent, while the index for physicians' services was unchanged. Other indexes that rose in December include airline fares (+2.7 percent), personal care (+0.5 percent), tobacco (+0.7 percent), and education (+0.1 percent).

In contrast to these increases, the motor vehicle insurance index fell 1.5 percent in December after declining 0.8 percent the prior month. The recreation index fell 0.2 percent in December, the same decline as last month. The communication index was unchanged over the month.

The index for all items less food and energy rose 5.5 percent over the past 12 months, its largest 12-month increase since the period ending February 1991. Major contributors to this increase include shelter (+4.1 percent) and used cars and trucks (+37.3 percent). However, the increase is broad-based, with virtually all component indexes showing increases over the past 12 months.

Not seasonally adjusted CPI measures

The Consumer Price Index for All Urban Consumers (CPI-U) increased 7.0 percent over the last 12 months to an index level of 278.802 (1982-84=100). For the month, the index increased 0.3 percent prior to seasonal adjustment.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) increased 7.8 percent over the last 12 months to an index level of 273.925 (1982-84=100). For the month, the index rose 0.3 percent prior to seasonal adjustment.

The Chained Consumer Price Index for All Urban Consumers (C-CPI-U) increased 6.9 percent over the last 12 months. For the month, the index increased 0.3 percent on a not seasonally adjusted basis. Please note that the indexes for the past 10 to 12 months are subject to revision.

The Consumer Price Index for January 2022 is scheduled to be released on Thursday, February 10, 2022 at 8:30 a.m. (ET).

Coronavirus (COVID-19) Pandemic Impact on December 2021 Consumer Price Index Data

Data collection by personal visit for the Consumer Price Index (CPI) program has been suspended almost entirely since March 16, 2020. When possible, data normally collected by personal visit were collected either online or by phone. Additionally, data collection in December was affected by the temporary closing or limited operations of certain types of establishments. These factors resulted in an increase in the number of prices considered temporarily unavailable and imputed. While the CPI program attempted to collect as much data as possible, many indexes are based on smaller amounts of collected prices than usual, and a small number of indexes that are normally published were not published this month.

For each month from March 2020 to December 2021, BLS has published a summary of the impact of the pandemic on the Consumer Price Index news release and data. The impact summary for December is available at www.bls.gov/covid19/consumer-price-index-covid19-impacts-december-2021.htm. Beginning with publication of January 2022 data in February 2022, this month-specific impact summary will be discontinued. However, information related to the impact of the pandemic will continue to be available at www.bls.gov/covid19/effects-of-covid-19-pandemic-on-consumer-price-index.htm.

Technical Note

Brief Explanation of the CPI

The Consumer Price Index (CPI) measures the change in prices paid by consumers for goods and services. The CPI reflects spending patterns for each of two population groups: all urban consumers and urban wage earners and clerical workers. The all urban consumer group represents about 93 percent of the total U.S. population. It is based on the expenditures of almost all residents of urban or metropolitan areas, including professionals, the self-employed, the poor, the unemployed, and retired people, as well as urban wage earners and clerical workers. Not included in the CPI are the spending patterns of people living in rural nonmetropolitan areas, farming families, people in the Armed Forces, and those in institutions, such as prisons and mental hospitals. Consumer inflation for all urban consumers is measured by two indexes, namely, the Consumer Price Index for All Urban Consumers (CPI-U) and the Chained Consumer Price Index for All Urban Consumers (C-CPI-U).

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) is based on the expenditures of households included in the CPI-U definition that meet two requirements: more than one-half of the household's income must come from clerical or wage occupations, and at least one of the household's earners must have been employed for at least 37 weeks during the previous 12 months. The CPI-W population represents about 29 percent of the total U.S. population and is a subset of the CPI-U population.

The CPIs are based on prices of food, clothing, shelter, fuels, transportation, doctors' and dentists' services, drugs, and other goods and services that people buy for day-to-day living. Prices are collected each month in 75 urban areas across the country from about 6,000 housing units and approximately 22,000 retail establishments (department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments). All taxes directly associated with the purchase and use of items are

included in the index. Prices of fuels and a few other items are obtained every month in all 75 locations. Prices of most other commodities and services are collected every month in the three largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by personal visits or telephone calls by the Bureau's trained representatives.

In calculating the index, price changes for the various items in each location are aggregated using weights, which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. For the CPI-U and CPI-W, separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 23 selected local areas. Area indexes do not measure differences in the level of prices among cities; they only measure the average change in prices for each area since the base period. For the C-CPI-U, data are issued only at the national level. The CPI-U and CPI-W are considered final when released, but the C-CPI-U is issued in preliminary form and subject to three subsequent quarterly revisions.

The index measures price change from a designed reference date. For most of the CPI-U and the CPI-W, the reference base is 1982-84 equals 100. The reference base for the C-CPI-U is December 1999 equals 100. An increase of 7 percent from the reference base, for example, is shown as 107.000. Alternatively, that relationship can also be expressed as the price of a base period market basket of goods and services rising from \$100 to \$107.

Sampling Error in the CPI

The CPI is a statistical estimate that is subject to sampling error because it is based upon a sample of retail prices and not the complete universe of all prices. BLS calculates and publishes estimates of the 1-month, 2-month, 6-month, and 12-month percent change standard errors annually for the CPI-U. These standard error estimates can be used to construct confidence intervals for hypothesis testing. For example, the estimated standard error of the 1-month percent change is 0.03 percent for the U.S. all items CPI. This means that if we repeatedly sample from the universe of all retail prices using the same methodology, and estimate a percentage change for each sample, then 95 percent of these estimates will be within 0.06 percent of the 1-month percentage change based on all retail prices. For example, for a 1-month change of 0.2 percent in the all items CPI-U, we are 95 percent confident that the actual percent change based on all retail prices would fall between 0.14 and 0.26 percent. For the latest data, including information on how to use the estimates of standard error, see <https://www.bls.gov/cpi/tables/variance-estimates/home.htm>.

Calculating Index Changes

Movements of the indexes from 1 month to another are usually expressed as percent changes rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period, while percent changes are not. The following table shows an example of using index values to calculate percent changes:

	Item A	Item B	Item C
Year I	112.500	225.000	110.000
Year II	121.500	243.000	128.000
Change in index points	9.000	18.000	18.000
Percent change	$9.0/112.500 \times 100 = 8.0$	$18.0/225.000 \times 100 = 8.0$	$18.0/110.000 \times 100 = 16.4$

Use of Seasonally Adjusted and Unadjusted Data

The Consumer Price Index (CPI) produces both unadjusted and seasonally adjusted data. Seasonally adjusted data are computed using seasonal factors derived by the X-13ARIMA-SEATS seasonal adjustment method. These factors are updated each February, and the new factors are used to revise the previous 5 years of seasonally adjusted data. The factors are available at www.bls.gov/cpi/tables/seasonal-adjustment/seasonal-factors-2021.xlsx. For more information on data revision scheduling, please see the Factsheet on Seasonal Adjustment at www.bls.gov/cpi/seasonal-adjustment/questions-and-answers.htm and the Timeline of Seasonal Adjustment Methodological Changes at www.bls.gov/cpi/seasonal-adjustment/timeline-seasonal-adjustment-methodology-changes.htm.

For analyzing short-term price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from weather events, production cycles, model changeovers, holidays, and sales. This allows data users to focus on changes that are not typical for the time of year. The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data are also used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index before adjustment for seasonal variation. BLS advises against the use of seasonally adjusted data in escalation agreements because seasonally adjusted series are revised annually.

Intervention Analysis

The Bureau of Labor Statistics uses intervention analysis seasonal adjustment for some CPI series. Sometimes extreme values or sharp movements can distort the underlying seasonal pattern of price change. Intervention analysis seasonal adjustment is a process by which the distortions caused by such unusual events are estimated and removed from the data prior to calculation of seasonal factors. The resulting seasonal factors, which more accurately represent the seasonal pattern, are then applied to the unadjusted data.

For example, this procedure was used for the motor fuel series to offset the effects of the 2009 return to normal pricing after the worldwide economic downturn in 2008. Retaining this outlier data during seasonal factor calculation would distort the computation of the seasonal portion of the time series data for motor fuel, so it was estimated and removed from the data prior to seasonal adjustment. Following that, seasonal factors were calculated based on this “prior adjusted” data. These seasonal factors represent a clearer picture of the seasonal pattern in the data. The last step is for motor fuel seasonal factors to be applied to the unadjusted data.

For the seasonal factors introduced for January 2021, BLS adjusted 72 series using intervention analysis seasonal adjustment, including selected food and beverage items, motor fuels, electricity, and vehicles.

Revision of Seasonally Adjusted Indexes

Seasonally adjusted data, including the U.S. city average all items index levels, are subject to revision for up to 5 years after their original release. Every year, economists in the CPI calculate new seasonal factors for seasonally adjusted series and apply them to the last 5 years of data. Seasonally adjusted indexes beyond the last 5 years of data are considered to be final and not subject to revision. For January 2021, revised seasonal factors and seasonally adjusted indexes for 2016 to 2020 were calculated and published. For series which are directly adjusted using the Census X-13ARIMA-SEATS seasonal adjustment software, the seasonal factors for 2020 will be applied to data for 2021 to produce the seasonally adjusted 2021 indexes. Series which are indirectly seasonally adjusted by summing

seasonally adjusted component series have seasonal factors which are derived and are therefore not available in advance.

Determining Seasonal Status

Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. Using these criteria, BLS economists determine whether a series should change its status from "not seasonally adjusted" to "seasonally adjusted", or vice versa. If any of the 81 components of the U.S. city average all items index change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used in the aggregation of the dependent series for the last 5 years, but the seasonally adjusted indexes before that period will not be changed. Thirty-four of the 81 components of the U.S. city average all items index are not seasonally adjusted for 2021.

Contact Information

For additional information about the CPI visit www.bls.gov/cpi or contact the CPI Information and Analysis Section at 202-691-7000 or cpi_info@bls.gov.

For additional information on seasonal adjustment in the CPI visit www.bls.gov/cpi/seasonal-adjustment/home.htm or contact the CPI seasonal adjustment section at 202-691-6968 or cpiseas@bls.gov.

Information from this release will be made available to sensory impaired individuals upon request. Voice phone: 202-691-5200; Federal Relay Service: 1-800-877-8339.

¹ Foods, fuels, and several other items are priced every month in all areas. Most other goods and services are priced as indicated: M - Every month.

1 - January, March, May, July, September, and November. 2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions.

³ Indexes on a December 1996=100 base.

⁴ Indexes on a December 2017=100 base.

⁵ Indexes on a December 1986=100 base.

⁶ 1998 - 2017 indexes based on substantially smaller sample.

⁷ Indexes on a December 2001=100 base.

⁸ Indexes on a 1987=100 base.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

¹ The C-CPI-U is designed to be a closer approximation to a cost-of-living index in that it, in its final form, accounts for any substitution that consumers make across item categories in response to changes in relative prices. Since the expenditure data required for the calculation of the C-CPI-U are available only with a time lag, the C-CPI-U is issued first in preliminary form using the latest available expenditure data at that time and is subject to four revisions.

Indexes are issued as initial estimates. Indexes are revised each quarter with the publication of January, April, July, and October data as updated expenditure estimates become available. The C-CPI-U indexes are updated quarterly until they become final. January-March indexes are final in January of the following year; April-June indexes are final in April of the following year; July-September indexes are final in July of the following year; October-December indexes are final in October of the following year.

Table 6. Consumer Price Index for All Urban Consumers (CPI-U): U.S. city average, by expenditure category, December 2021, 1-month analysis table

¹ The 'effect' of an item category is a measure of that item's contribution to the All items price change. For example, if the Food index had an effect of 0.40, and the All items index rose 1.2 percent, then the increase in food prices contributed 0.40 / 1.2, or 33.3 percent, to that All items increase. Said another way, had food prices been unchanged for that month the change in the All items index would have been 1.2 percent minus 0.40, or 0.8 percent. Effects can be negative as well. For example, if the effect of food was a negative 0.1, and the All items index rose 0.5 percent, the All items index actually would have been 0.1 percent higher (or 0.6 percent) had food prices been unchanged. Since food prices fell while prices overall were rising, the contribution of food to the All items price change was negative (in this case, -0.1 / 0.5, or minus 20 percent).

² A statistic's margin of error is often expressed as its point estimate plus or minus two standard errors. For example, if a CPI category rose 0.6 percent, and its standard error was 0.15 percent, the margin of error on this item's 1-month percent change would be 0.6 percent, plus or minus 0.3 percent.

³ If the current seasonally adjusted 1-month percent change is greater than the previous published 1-month percent change, then this column identifies the closest prior month with a 1-month percent change as (L)arge as or (L)arger than the current 1-month change. If the current 1-month percent change is smaller than the previous published 1-month percent change, the most recent month with a change as (S)mall or (S)maller than the current month change is identified. If the current and previous published 1-month percent changes are equal, a dash will appear. Standard numerical comparisons are used. For example, 0.8% is greater than 0.6%, -0.4% is less than -0.2%, and -0.2% is less than 0.0%. Note that a (L)arger change can be a smaller decline, for example, a -0.2% change is larger than a -0.4% change, but still represents a decline in the price index. Likewise, (S)maller changes can be increases, for example, a 0.6% change is smaller than 0.8%, but still represents an increase in the price index. In this context, a -0.2% change is considered to be smaller than a 0.0% change.

⁴ Not seasonally adjusted.

⁵ Indexes on a December 1997=100 base.

⁶ Special indexes based on a substantially smaller sample. These series do not contribute to the all items index aggregation and therefore do not have a relative importance or effect.

⁷ Indexes on a December 2007=100 base.

⁸ Indexes on a December 2005=100 base.

⁹ Indexes on a December 1986=100 base.

¹⁰ Indexes on a December 1993=100 base.

¹¹ Indexes on a December 2009=100 base.

¹² Indexes on a December 1990=100 base.

¹³ Indexes on a December 1983=100 base.

¹⁴ Indexes on a December 2001=100 base.

¹⁵ Indexes on a December 2019=100 base.

¹⁶ Indexes on a December 1982=100 base.

¹⁷ Indexes on a December 1996=100 base.

¹⁸ Indexes on a December 1988=100 base.

¹ The 'effect' of an item category is a measure of that item's contribution to the All items price change. For example, if the Food index had an effect of 0.40, and the All items index rose 1.2 percent, then the increase in food prices contributed 0.40 / 1.2, or 33.3 percent, to that All items increase. Said another way, had food prices been unchanged for that year the change in the All items index would have been 1.2 percent minus 0.40, or 0.8 percent. Effects can be negative as well. For example, if the effect of food was a negative 0.1, and the All items index rose 0.5 percent, the All items index actually would have been 0.1 percent higher (or 0.6 percent) had food prices been unchanged. Since food prices fell while prices overall were rising, the contribution of food to the All items price change was negative (in this case, -0.1 / 0.5, or minus 20 percent).

² A statistic's margin of error is often expressed as its point estimate plus or minus two standard errors. For example, if a CPI category rose 2.6 percent, and its standard error was 0.25 percent, the margin of error on this item's 12-month percent change would be 2.6 percent, plus or minus 0.5 percent.

³ If the current 12-month percent change is greater than the previous published 12-month percent change, then this column identifies the closest prior month with a 12-month percent change as (L)arger as or (L)arger than the current 12-month change. If the current 12-month percent change is smaller than the previous published 12-month percent change, the most recent month with a change as (S)mall or (S)maller than the current month change is identified. If the current and previous published 12-month percent changes are equal, a dash will appear. Standard numerical comparison is used. For example, 2.0% is greater than 0.6%, -4.4% is less than -2.0%, and -2.0% is less than 0.0%. Note that a (L)arger change can be a smaller decline, for example, a -0.2% change is larger than a -0.4% change, but still represents a decline in the price index. Likewise, (S)maller changes can be increases, for example, a 0.6% change is smaller than 0.8%, but still represents an increase in the price index. In this context, a -0.2% change is considered to be smaller than a 0.0% change.

⁴ Indexes on a December 1997=100 base.

⁵ Special indexes based on a substantially smaller sample. These series do not contribute to the all items index aggregation and therefore do not have a relative importance or effect.

⁶ Indexes on a December 2007=100 base.

⁷ Indexes on a December 2005=100 base.

⁸ Indexes on a December 1986=100 base.

⁹ Indexes on a December 1993=100 base.

¹⁰ Indexes on a December 2009=100 base.

¹¹ Indexes on a December 1990=100 base.

¹² Indexes on a December 1983=100 base.

¹³ Indexes on a December 2001=100 base.

¹⁴ Indexes on a December 2019=100 base.

¹⁵ Indexes on a December 1982=100 base.

¹⁶ Indexes on a December 1996=100 base.

¹⁷ Indexes on a December 1988=100 base.

March 1, 2022

Central Disposal, LLC plans to exercise the right of the CPI clause as stated on Page 14, Section 9.6.1 of the current Solid Waste Collection, Recycling and Disposal Services Request for Proposal dated March 2, 2020.

The Consumer Price Index referenced is the Consumer Price Index for All Urban Consumers: Water and Sewer and Trash Collection Services as published by the U.S. Bureau of Labor Statistics.

We are requesting an annual increase of 3.5% effective July 1, 2022. If you need additional information, do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Jon-Mark Adcock", with a long horizontal line extending to the right.

Jon-Mark Adcock
General Manager
Central Hauling

RESOLUTION NO. _____

A RESOLUTION UPDATING THE CITY FEE SCHEDULE BY SETTING THE MONTHLY RATES AND FEES FOR SOLID WASTE SERVICES PURSUANT TO SUBSECTIONS (a), SECTION 23-38, ARTICLE II, CHAPTER 23 OF THE CITY CODE; AND PROVIDING FOR THE RE-ADOPTION OF THE CITY FEE SCHEDULE IN WHOLE.

WHEREAS, The City, through the passage of Ordinance No. 2599NS, has adopted a City Fee Schedule as a part of the Code of the City of Shawnee, Oklahoma that contains the description of various fees administered by the City;

WHEREAS, pursuant to Ordinance No. 2599NS, Subsequent versions, adoptions, and updates of the City Fee Schedule shall be accomplished by resolution of the City Commission;

WHEREAS, Part II, Chapter 23, Article II, Sections 23-38 provides for the setting and updating of monthly charges for the collection and removal of solid waste, adopted and updated by resolution of the City Commission, and that such rates shall be described in the City Fee Schedule;

WHEREAS, Section 9.6.1 of Modification to Unit Prices included in the General and Special Provisions for Solid Waste Collection, Recycling and Disposal Services contained with the Request for Proposals for the current Contract for Solid Waste Collection, Recycling and Disposal Services dated July 1, 2020 provides as follows

- 9.6.1 Fees which may be charged by the CONTRACTOR for the second and subsequent period of the contract will be adjusted upward or downward to reflect changes in the cost of operations, as reflected by fluctuations in the Consumer Price Index for All Urban Consumers: Water and Sewer and Trash Collection Services, as published by the U.S. Bureau of Labor Statistics. It is expressly understood and agreed that the maximum annual increase shall not exceed 3.5 percent (3.5%). At the end of the last day of the last month of each contract period, (the "Rate Modification Date") the fees will be increased or decreased for the ensuing contract period in a percentage amount equal to ninety percent (90%) of the net percentage change of the All Items Index, plus ten percent (10%) of the net percentage change of the Gasoline Index. All percentage changes are to be computed as the difference between the index value for the April reporting period for the prior year and the April reporting period of the contract period, divided by the index value for the previous year;

and

WHEREAS, Section 5 of the Memorandum of Understanding dated May 18, 2020, provides that the Contract Rate shall be increased, yearly, in accordance with the percentage increase in the Consumer Price Index over the previous twelve-month period from 2020 (i.e. the difference, expressed as a percentage, between the value of the CPI in June, 2021, and the value of the CPI published in June, 2020). The new adjusted Contract Rate shall begin on July 1, of each year. If in any year the CPI decreases, the Contract Rate for that year shall remain flat (and shall not increase or decrease);

WHEREAS, a component of the Schedule of Quotes approved by the Contract for Solid Waste Collection, Recycling and Disposal Services dated July 1, 2020 provides for a monthly Hazardous Waste Collection Fee, said collection to be during the Spring Clean-Up. This component has not been previously included in the monthly charges to residential customers and City Commission wishes to update the rates to include the hazardous waste collection fee; and

WHEREAS, the City Commission wishes to update the City Fee Schedule in a manner described below so as to set monthly rates and fees for solid waste services pursuant to Section 23-38;

NOW THEREFORE, BE IT RESOLVED BY THE MAYOR AND CITY COMMISSIONERS OF THE CITY OF SHAWNEE, OKLAHOMA:

Section 1. Sub-Section (a), Section 23-28, Article II, Chapter 23 of the Code of the City of Shawnee provides that: Monthly charges shall be in an amount as described in the city fee schedule, adopted and updated by the City Commission from time to time.

Accordingly, the Solid Waste rates listed in the City Fee Schedule, pursuant to, and associated with, Sub-Section (a), Section 23-38, Article II, Chapter 23 of the Code of the City of Shawnee, are hereby updated to read as follows:

- (a) Solid Waste Rates: The monthly charge for solid waste service for consumers inside the city limits:

RESIDENTIAL

Type of Service	Monthly Rate (Includes 3.5% CPI Increase Plus \$1.00 per month hazardous waste fee)
Small Polycart (65 gallon)	\$17.91
Large Polycart (95 gallon)	\$22.57
Additional Polycart (95 gallon)	\$12.39
Solid Waste Service Only	\$22.57

Section 2. **Annual review of rates and possible increases.** City Staff shall annually, no later than December 31 of each calendar year, review the Consumer Price Index (CPI) through the United States Bureau of Labor Statistics, to measure the average change over time in the prices paid by consumers for solid waste collection and removal services. Increases of the above listed rates for residential accounts may be amended per CPI as of December 31 of the calendar year. Said rate increases will take into effect on April 1 of the following calendar year. A Resolution will be presented to the Commission to update the City Fee Schedule of any rate changes.

Section 3. **Adoption and Update of City Fee Schedule.** That attached hereto is the updated portion of the City Fee Schedule as created above (Exhibit 'A') and the updated City Fee Schedule in whole (Exhibit 'B'). This Resolution updates and changes City Fee Schedule only to the extent

as described above. All other existing fees, fines, bonds, and insurance amounts described in the City Fee Schedule, not expressly updated herein, shall remain the same, and are otherwise re-adopted, for full force and effect, in the Code of the City of Shawnee.

Section 4. **Effective Date.** The effective date of the fee changes in this Resolution is May 1, 2022.

PASSED AND APPROVED this _____ day of March, 2022.

ED BOLT, MAYOR
